The following is an examiner's statement of reasons for allowance: The prior art of record teaches various digital hearing instruments thereon, for example U.S. patent number 6,144,748. However, the prior art of record fails to show claim 15, a digital hearing instrument configured to be inserted into a patient's ear canal comprising: an inner microphone for receiving a second audio signal from inside of the patient's ear canal; and a serial data port for coupling the digital hearing instrument to an external device, the serial data port being configured to transmitted the second audio signal to the external device and combined with all the limitations of claim 15; and claim 26, a hearing instrument comprising: a serial data port for coupling the hearing instrument to an external device separate from the hearing instrument the serial data port being operable to transmit first and second digital audio signals between the hearing instrument and the external device, wherein said first audio digital audio signal is one of said audio input signal, said processed audio signal and said audio output signal, and wherein said second digital audio signal is another one of said audio input signal, said processed audio signal, and said audio output signal; and selection circuitry operable to select one of the first and second digital audio signals for transmission to the external device via the serial data port, wherein the hearing instrument is operable

to receive a control signal for the selection circuitry, and the selection circuitry is further configured to select between said first and second digital audio signal based on the control signal and combined with all limitations of claim 26.
